

"Kitchen Cutter" (\$259.00) from Kitchen Craft Cookware at www.kitchencraftcookware.com 800-800-2850
Purchased 6/30/12 - Issues with metal shavings coming off of stem of grinder and ending up in food on 8/15/12.

Why is rust occurring on the steel(?) screw? Note peeling on the stem tines that hold the cup.

The following show the metal shavings that came off in the sleeve of the grinder.

Pictures show the stem and the metal coat that's peeling away. The bottom picture shows bubbling and rust occurring on stem.
